Alpharetta Water Transmission Main

# Objectives of Project

Presented by Dr. Rob Bocarro

# Objectives of Project

The Alpharetta Water Transmission Main Project is intended to:

- Improve long-term water system supply and pressure to Alpharetta and areas to north and west
- Help water system cope with peak demands during summer months
- Improve ability of system to cope with emergency fire flows

54-inch ductile iron pipe installed on Kimball Bridge Rd in 2011
